Lahore, Pakistan

SUMMARY

I am a highly motivated and detail-oriented frontend developer with expertise in React, JavaScript, Bootstrap. My proven ability to create user-friendly web applications reflects my passion for delivering functional and aesthetically pleasing solutions. I excel at integrating design and functionality for captivating digital experiences. Currently, I seek a challenging frontend development opportunity to apply my skills and knowledge, driving innovation and contributing to the company's success.

EDUCATION

Bachelor of Computer Science
University Of Education
Graduation Year :2019 – 2023
GPA: 3.44/4.0

SKILLS

- React JS
- React-Redux
- Node JS
- Express JS
- Mongoose
- Mongo DB
- REST API`s
- JavaScript
- Tailwind CSS
- Bootstrap
- HTML
- CSS

WORK EXPERIENCE

React Js Deveopler
Explore Logics IT Solutions
Nov 2023 - Present

During my time at Explore Logics as a React JS developer, I was part of a vibrant and collaborative environment that fostered creativity and teamwork. I found myself deeply involved in crafting user interfaces that adapted seamlessly to various devices and solving intricate coding puzzles. Working alongside a talented group of individuals, I contributed to bringing captivating features to life, leaving a lasting impact on our projects. This experience not only deepened my technical skills but also ignited a passion within me for delivering solutions that truly make a difference. Now, I'm eager to bring this dedication and expertise to a new role, where I can continue to grow and contribute in the field of frontend development.

PROJECTS

FoodPanda Clone

This project is a clone of the FoodPanda website developed using React.js, aiming to replicate its core functionalities and design. It boasts a responsive design, ensuring a seamless experience across various devices. Users can browse through a wide range of food items with detailed descriptions and images, utilize user authentication features to register, log in, and maintain personalized profiles. Additionally, they can place orders, track their status, and receive updates on delivery progress. Leveraging technologies such as React.js, CSS for styling, JWT for user authentication, Axios for HTTP requests, and React Router for navigation management, this project demonstrates proficiency in frontend development and web application design.

Osteopathe Montreal

Revamped the traditional Osteopathe Montreal website into a sleek, modern single-page application using React.js and Bootstrap. Employing cutting-edge techniques, I seamlessly migrated the static HTML site to a dynamic React.js environment, enhancing its responsiveness and user interactivity. Leveraging the power of React components and Bootstrap's grid system, I meticulously crafted a visually stunning and user-friendly experience. The project showcases my proficiency in modern web development technologies and my ability to transform static websites into dynamic, engaging experiences.
